

Mathematics – Class 10

Foundation concepts for higher secondary mathematics

Course Overview

Class 10 Mathematics builds strong analytical and problem-solving skills. These topics form the backbone for Class 11 and 12 Mathematics, Science, Engineering, and competitive exams.

Topics Covered

- **Algebra:** Linear Equations in Two Variables, Quadratic Equations
- **Geometry:** Triangles, Circles, Constructions
- **Trigonometry:** Trigonometric Ratios and Identities
- **Coordinate Geometry:** Distance Formula, Section Formula
- **Statistics & Probability:** Mean, Mode, Probability Concepts

Learning Outcomes

- Develop logical thinking and reasoning ability
- Apply formulas accurately in real-world problems
- Understand graphical representation of equations

- Strengthen base for competitive examinations

★ Study Tips

- ✓ Practice problems daily
- ✓ Revise formulas regularly
- ✓ Focus on diagrams and constructions
- ✓ Solve previous year question papers
